Mr. Sy Levine, Regional Manager
Division of Air Pollution Control
Illinois Environmental Protection Agency
1701 First Avenue
Maywood, IL 60153

Dear Mr. Levine:

I.D. #031 600 FHI
Your Letter 10 May 1991

The failure of the Chicago Emulsion Plant (CEP) to implement a portion of the site's Operating Program for the control of fugitive particulate emissions was an oversight that occurred during a Divisional reorganization.

The Chicago Emulsion Plant was and is included in the Operating Program that was approved by the Agency on 31 March 1983. This program prescribes the monthly sweeping of paved traffic roads and parking facilities. However, during the reorganization, this requirement was inadvertently deleted at CEP. We have taken steps to have the Chicago Emulsion Facility reinserted into the sweeping contract; consequently, any further violations will not occur.

Should you have any further questions regarding this matter, please do not hesitate to contact me or Mr. James Jones.

Yours truly,

THE SHERWIN-WILLIAMS COMPANY
